Glue & sealant **VELL**

MONTAGE GLUE

The glue has been designed to achieve high flexibility, guaranteeing the durability of the connection. For PVC and general construction applications. It provides effective adhesion to most materials and common building surfaces. Recommended for assembly panels and profiles **VELL**.

SANITARY SILICONE

One-component, elastic sealing compound with a neutral curing system. Recommended for waterproofing in bathrooms and kitchens. It is distinguished by very good adhesion to almost all construction substrates. Protected against fungal growth and mold.

BENEFITS:

Protected against mold & fungi! ● For gluing & sealing ● Water-resistant & waterproof
Highly flexible ● Resistant to UV radiation ● For bathroom & kitchen

SEALING SYSTEMS

PVC STRIP CLADSEAL

It is used for mounting **VELL** panels and sealing the connection between the mounting surface and the shower tray or a bathtub. It not only hides and protects the silicone, but also allows you to keep its flexibility in the event of a fusion of the weld.

TAPE AQUASTRAP

AquaStrap is a leading up-stand seal used for sealing a shower tray/pan or bath tub. AquaStrap will remain watertight in the event of the silicone seal leaking through joint movement or natural deterioration.

High quality and satisfaction guarantee

All products supplied by **VELL** are CE marked.

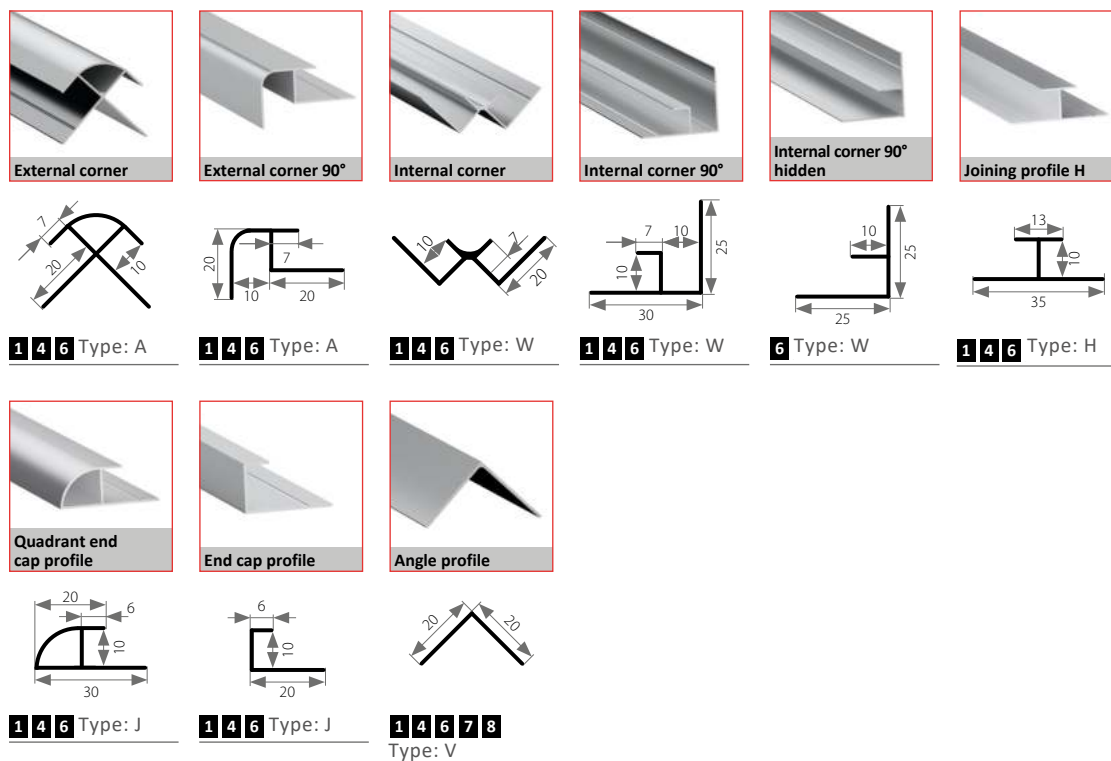

- The declaration of performance for the product is available at vell.pl.
- The **VELL** panel has a 5-year warranty, does not cover mechanical damage to the product, failure to follow the installation and maintenance instructions.
- Installation instructions and information on the product warranty can be downloaded from vell.pl.

CAUTION: Every effort has been made to ensure that the information contained in this document was correct at the time of printing, and we reserve the right to change product specifications at any time without notice. Photographs reproduced in this publication are within the limits of the printing process and cannot be used for color matching of the products. All photos are used only to provide a general idea of the goods we sell. For the exact color, we advise you to refer to the product sampler.

Finishing profiles **VELL**

Appropriate profiles should be used to finish the edges or join the panels in the corner. Use the table below to choose the right profiles for your project. They give the **VELL** panels a more elegant finish and emphasize the look of the room.
